

GRRIP II Watershed Analysis for Norton, MA

Estimates of Land Use, Impervious Surface and Annual Nonpoint Source Pollution Loads

2003 Land Use Types

- Crop Land
- Pasture
- Forest
- Non-Forested Wetland
- Mining
- Open Land
- Participation Rec.
- Spectator Rec.
- Water-based Rec.
- Multi-Fam. Res.
- High Density Res.
- Medium Dens. Res.
- Low Dens. Res.
- Salt Water Wetland
- Commercial
- Industrial
- Urban Open
- Transportation
- Waste Disposal
- Water
- Woody Perennial (Includes Cranberry Bogs and Nurseries)

Land Use Allocation 182.6 acres

Water (0.1%)
Wetlands (0.2%)
Agriculture (0.4%)
Cropland & Pasture
Open Land (0.1%)
Water-based Rec. (0.0%)
Spectator Rec. (0.0%)
Participation Rec. (0.0%)
Multi-Fam. Res. (0.1%)
High Density Res. (0.1%)
Medium Dens. Res. (0.1%)
Low Dens. Res. (0.1%)
Wetlands (0.1%)
Transportation (0.0%)
Waste (0.0%)

Land Use Area in Acres is 182.6
 Impervious Area is 14.2 Acres
 Percentage of Imperviousness = 7.8%
 Avg Annual Nitrogen Load = 866.7 pounds
 Avg Annual Phosphorus Load = 116.6 pounds
 Avg Annual Suspended Solids = 20453.6 pounds

- Drainage System
 - Potential Vernal Pools
 - Certified Vernal Pools
 - Public Water Supply
 - Public Beach
 - Shellfish Beds

 - Rarecutthroat_noon
 - Rareperch_noon
 - Rarebrook_noon
 - Intermittent Wetland Protect
 - Cold Water Fisheries
 - Anadromous Fish Run
 - Critical Area after Storm Event
 - Wetlands
 - Solid Waste Facility
 - Estimated and Priority Habitats
 - ACEC
 - Zone 2
 - Zone B
 - Rivers and Streams
 - Lakes & Ponds
 - Road Island Towns
 - Other MA Towns
 - Town Boundary
 - Ocean
 - Transmission Lines
 - Railroad
- Roads (Mass Hwy Functional Classes)**
- Local Rd. & Non-Exempt Functional Class Res (F-0F-0)
 - Interstate (F-1)
 - Rural Principal Arterial & Urban Exp (F-2)
 - Rural Minor Arterial & Urban Exp (F-3)
 - Other Urban Principal Arterial (F-4)
 - Urban Minor Arterial or Rural Major Collector
 - Urban Collector or Rural Minor Collector (F-5)

Cross St Pond

1&2

123

Route 123 near Cottage St; an all culvert under road drains directly into channel through lush wetland near new development. Evidence of mosquito ditching. This site may retain stormwater during peak flows. Larger culvert may be necessary here.

The GRRIP II (Geographic Roadway Runoff Inventory Program) is an analysis of roadway drainage facilities located in environmentally sensitive areas on defined Federal Aid Highways. GRRIP II analyzed towns in the SRPEDD region that fall within the Narragansett and Taunton River Watersheds. The Watershed Analysis Project further details several of the drainage systems within each of the towns in the Narragansett and the Taunton River Watersheds to show the general health of the contributing watershed from the specified drainage system by outplotting an area of responsibility using the Scholar Watershed Metadata and the Watershed Tools Extension developed by Mass GIS.

Map prepared by
 SRPEDD
 88 Broadway, Taunton MA
 August 2004

Watershed Analysis produced
 using the Watershed Tools
 Extension developed by
 Mass GIS.

This map is produced by SRPEDD (Southeastern Regional Planning and Economic Development District), Taunton, MA. Portions of the source digital data may have been supplied by the Massachusetts Executive Office of Environmental Affairs, MassGIS, Cable Corporation of Norton, MA, SRP, the Bureau of Transportation Planning & Development, Division of Air Quality, Division of Fisheries & Wildlife, Road and Bay Project, USDA, State Conservation Service, Coastal Land Management, National Oceanic & Atmospheric Administration (NOAA).

The location of feature boundaries shown on this map are approximate and are provided for planning purposes only. This map is not intended for legal or planning or survey purposes.

The funding for this project was provided by the Federal Highway Administration (FHWA) within Massachusetts Highway Department.

Inset of Watershed Location
